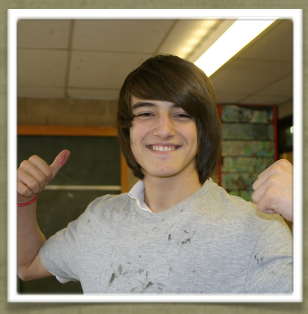
WHY MOSAIC ART?

team building
work experience education
life skill learning
communication skills
community interaction
developing art/trade skills



MOSAIC ART

Work experience and skill based secondary education

Stephanie works throughout Wales and the South developing and running projects for secondary pupils that aid educational development in preparation for the workplace or for further education. Engagement is key to any project and Stephanie provides a variety of art skills, design and mosaic construction as a vehicle to teach skills across the curriculum. Where applicable Stephanie finds links and engages pupils with local communities to aid and develop intergenerational and community skills whilst providing a service. Collaborators include- photographic, animators, performance artists and poets.
